

The objective dissemination of information "news" in the hands of a small collective which wields total control of "who,what,when,and where" is an impossibility. Objectivity is lost. Every entity sheltered by the same umbrella supports the agenda or objective of the others, or they wouldn't be allowed to share the shade!

The American people, perhaps more than ever need the security of a free and unbiased reporting media and a media that accepts and allows for the flow of uninhibited ideas & ideals. The total & unchallenged control of information is historically the first goal of any looming facist state!
